<sup>1</sup> The rebaselined numbers reflect the 2021 GHG emissions according to the Company's 2023 operational boundary.

<sup>2</sup> The 2021 rebaselined emissions reported in 2024 were independently assured in 2025. When going back to the 2021 source data, we found some gaps in the original evidence. In order to present the most accurate data possible, estimated data based on the evidence available was used leading to small variances in most categories. None of the changes were found to be material, and remain under the 5% threshold set out in our Emissions Recalculation Policy.

<sup>3</sup> Includes gas consumption from Gas Fast Ltd, but excludes diesel consumption from their fleet of three vehicles.

<sup>4</sup> Represents electricity consumption from Gas Fast Ltd (trading as Wickes Solar) which is not part of the Wickes Building Supplies Ltd renewable electricity contract.
